EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

This communication is an Examiner's reasons for allowance in response to application filed on 05/26/2006, assigned serial 10/563,370 and titled "Method and System for Determining a Tyre Load during the Running of a Motor Vehicle."

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The applicant's request for continued examination filed 11/18/2010 has been fully considered. After carefully reconsidering the application and the previous applied prior art, the examiner has realized the application is patentably distinct from the cited prior art.

The prior art closest to the subject matter of claims 48, and 62 is the reference of Wilson (U.S. 2003/0058118 A1) which discloses a system/method for determining the deformation of a vehicle tire based on deflection-related information such as tire load, etc.

The subject matter of claims 48 and 62 are distinguished from this prior art in that they comprise the method of for determining a load exerted on a tyre, comprising the steps of "deriving the load exerted on the tyre from the amplitude, the rotation speed, and the inflation pressure; wherein deriving the load exerted on the tyre comprises: identifying a set of characteristic functions corresponding to the estimated inflation pressure; and determining, from the set of characteristic functions, a corresponding set of expected radial-deformation amplitudes corresponding to the estimated rotation speed.

It is found that none of the references or the combination teaches or suggests such the features presented herein above. For at least the reasons set forth above, claims 48, 62, and their dependent claims are now set in a condition for allowance.

The previous non-elected claims 67-94 have been cancelled since the applicant elected claims 48, 49, 51-57, 59, 61-66 for examination without pointing out the supposed errors in the previous restriction requirement.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (571) 272-6985. The examiner can normally be reached on from 8:00AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Keith can be reached on 571-272-6878.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
